**EXHIBIT 298I-2: Total floor area tabulation form
Attachment for building permits and demolition permits in
Subareas 10A, 11A, and 12A of PD 298.**

This form must be reviewed and approved by the traffic engineer, and attached to the building permit application before the director may issue a building permit. Check the department of development services files for PD 298 and PD 749 to ensure that you are using the most recent figures for current total floor area. The tabulation forms must be numbered sequentially. A copy of this form, signed by the traffic engineer, must be filed in the department of development services and the building official's PD files for PD 298 and PD 749 at the time it is submitted with a building permit application.

Tabulation No. _____ to determine total floor area in the Baylor expanded district

Address of building/demolition site: _____

1. Current total floor area in the Baylor expanded district
(Line 4 from the previous total floor area tabulation) _____
2. Total floor area added or removed
from the Baylor expanded district by the attached application for
permit (enter as a negative number if applicable) _____
3. Square footage of total floor area for which
the building or demolition permit has expired or been withdrawn
or other changes in floor area not included in previous tabulations.
Applicant must provide supporting evidence. (enter as a negative
number if applicable). _____
4. Add Lines 1, 2, and 3 for the current
total floor area in the Baylor expanded district. _____

Prior to issuance of the first building permit for construction in the Baylor expanded district that would result in a total floor area in the Baylor expanded district of more than 4,068,964 square feet and for the first permit for subsequent increments to total floor area of 500,000 square feet, the applicant must comply with the TMP requirements set forth in Section 51P-298.120 and 51P-749.111 prior to making application for a building permit.

This application has been reviewed and any applicable TMP requirements will be monitored by the traffic engineer for the department of development services.

Approved by: _____ Date _____
Traffic Engineer
